SANDEEP M

Cybersecurity Engineer

MSandeep1005@gmail.com +91 7200446661 Chennai Linkedln GitHub

Summary

Motivated and detail-oriented Cybersecurity professional with a strong foundation in cybersecurity, network security, vulnerability assessment, and penetration testing. Hands-on experience with security tools such as Nmap and Wireshark for network reconnaissance, vulnerability identification, port scanning, and traffic analysis. Familiar with VAPT methodologies, web application security, API security, OWASP security principles, and vulnerability assessment processes. Strong analytical and problem-solving skills with an interest in application security, cloud security, threat detection, and security automation. Eager to apply technical knowledge and hands-on cybersecurity skills to support security assessments, identify vulnerabilities, analyze threats, and strengthen the security of enterprise systems as a Cybersecurity Intern.

Professional Experience

Cybersecurity intern, *TEALVUE SOFTWARE SOLUTIONS PVT LMT* 09/2026 – Present | CHENNAI,TAMILNADU

- Assisted with **GRC activities**, cybersecurity policy development, control documentation, and regulatory compliance mapping.
- Supported **SOC analysis and security monitoring**, including review of alerts, suspicious events, and potential security incidents.
- Monitored and analyzed **phishing attacks and email-based threats**, documenting indicators and supporting mitigation activities.
- Contributed to **IT infrastructure and server security assessments**, identifying gaps in access control, network security, and monitoring.
- Supporting **server engagement, maintenance, security hardening, and operational activities** as part of ongoing infrastructure security initiatives.

Cybersecurity Intern, *NOKIA Solutions & Networks India PVT Ltd* 05/2026 – 06/2026 | Chennai,Tamil Nadu

- Cybersecurity Intern with hands-on experience in ethical hacking, web application security, and network architecture, well-suited to securing **cloud-native and AI-powered enterprise environments, including LLM-integrated and agentic AI systems.**
- Skilled in identifying vulnerabilities using the OWASP Top 10 framework (SQL Injection, XSS, CSRF, authentication flaws) and Burp Suite for web application testing, **with applied awareness of AI-specific attack surfaces such as prompt injection and model abuse.**
- Working knowledge of automation platforms including Power Automate, UiPath, and Ansible, **applied toward evaluating and securing AI-driven, agentic automation workflows and autonomous decision-making pipelines.**
- Actively exploring **generative AI architectures, LLM orchestration frameworks (such as LangChain and AutoGen), and multi-agent systems,** with attention to associated risks such as prompt injection, data integrity, and secure AI agent orchestration.
- Comfortable leveraging **AI-powered security tools and co-pilot assistants** to support research, vulnerability analysis, and automation scripting, reflecting adaptability to **AI-augmented and agentic security workflows.**

security Researcher, *VIT University* 09/2023 – Present | Vellore,Tamil Nadu

- Co-authored a research paper(UNMASKING DIGITAL IMPOSTERS: A MACHINE LEARNING FRAMEWORK FOR SOCIAL MEDIA PROFILE DETECTION) presented at the ICISAS conference, Curtin University Dubai, 2025, reflecting academic and practical commitment to cybersecurity.

Education

Integrated MTECH Software Engineering, *VIT University* 09/2022 – Present | Vellore,Tamil Nadu

Skills

- Hands on experience on the Linux Operating System
- Ethical Hacking & Responsible Disclosure
- Python Programming
- AI-Driven Security & Agentic Automation Risks
- Vulnerability Assessment & Penetration Testing

Projects

Graphical Password and Fingerprint Authentication System 12/2025 – 04/2026

- Designed a secure multi-factor authentication system combining graphical passwords and fingerprint biometrics.Improved resistance to brute-force and shoulder-surfing attacks using cryptographic techniques (SHA-256,AES) while enhancing usability through image-based authentication and biometric verification.

Crop Disease Detection 07/2025 – 11/2025

- Contributed to building an AI-powered application for real-time crop disease detection, using live camera feeds and image uploads with a YOLO-based computer vision model for disease identification.

Blockchain-Based Merchant Payment System 01/2024 – 04/2024

- Developed a decentralized merchant payment system using blockchain and smart contracts to ensure secure, transparent, and tamper-proof transactions. Reduced intermediaries, enabled real-time settlements, enhanced fraud prevention, and promoted financial inclusion through wallet integration and tokenized payments.

Certificates

- **AWS Certified Cloud Practitioner**
- **IBM Storage and Cloud Essentials**
- **Ethical Hacker**
- **Endpoint Security**
- **Data Analytics Essentials**
- **Currently pursuing and preparing for COMPTIA SEC+ and CEH**

Publications

- Got best presenter award at **ICISAS 2025** in **Dubai** for presenting my Research paper on the topic '**UNMASKING DIGITAL IMPOSTERS: A MACHINE LEARNING FRAMEWORK FOR SOCIAL MEDIA PROFILE DETECTION**', which will be published in SPRINGER publications soon.
- **Agentic AI-Based Autonomous Cyber Defence Platform for Security Operations Centers (SOC)** *Final-Year Integrated M.Tech Project | Research & Patent Development – Ongoing*

Declaration

I hereby declare that above information is correct to the best of my knowledge.
